The course will take place at Hospedaria Belo Horizonte in Almádena, between Lagos and Sagres, far away enough from Algarve's mass tourism.

Besides good music there is good food, nature, sea, and many other things to enjoy. The Hospedaria Belo Horizonte is unique in offering the possibilities to live, work and eat at the same place, which has proved to be very practical, supporting the work and allowing intense social contact.

However if you wish to stay in a more comfortable or exquisite hotel, there are many possibilities around this area, I can advise you.

You also can participate as a listener, just for a weekend, or as you wish. If you are a pianist or organist and have little experience with ancient instruments, to start with the clavichord is a wonderful thing, even if you don't have an instrument to practise on.

About my teaching

My aim as a teacher is to help pupils develop their capacities in order to get the most enjoyment out of their music making.

To have a conception of a piece helps us find out how to play it, but it is a process by itself to achieve this.

Creative practice is not only the most exciting, it is also the most efficient way to keep this process in motion and develop our skills.

My teaching focuses particularly on these issues, and suits any level of development and any keyboard instrument.
